

Subject Line: **Support for people living with genetic, rare and undiagnosed conditions in [constituency]**

Dear [insert name of MP],

I live in the [insert name of town/village]. I am asking you to support people affected by genetic, rare and undiagnosed conditions during your time in Parliament.

Collectively, more than 3.5 million people in the UK are affected by these conditions.

[You should insert information here about your interest in genetic, rare and undiagnosed conditions e.g. you represent a support organisation, you are a person with a genetic, rare or undiagnosed condition, you are a clinician etc. It's best to limit this to a few sentences]

[Genetic Alliance UK](#) provide parliamentarians with information and signposting support to help people living with genetic, rare and undiagnosed conditions in their constituency. They are also able to connect parliamentarians with local services and organisations that support people with these conditions and provide briefings ahead of parliamentary debates. You can email [policygroup@geneticalliance.org.uk](mailto:policygroup@geneticalliance.org.uk) for further information or to arrange a briefing meeting.

I would be delighted if you became a champion for genetic, rare and undiagnosed conditions in Westminster and I look forward to seeing your work in Parliament.
