

Genetic Alliance UK is an alliance of over 220 organisations, charities and support groups working together to improve the lives of everyone in the UK living with genetic, rare and undiagnosed conditions

**There are around
3.5 million
people living with a rare
condition in the UK**

Find further information and resources on our website and keep up to date with our work by following Genetic Alliance UK across all social media platforms.

Genetic Alliance UK supports people with genetic, rare and undiagnosed conditions by:

- **advocating for improved care**
- **progressing medical research**
- **increasing awareness**
- **improving information and support**

We run two long standing projects:

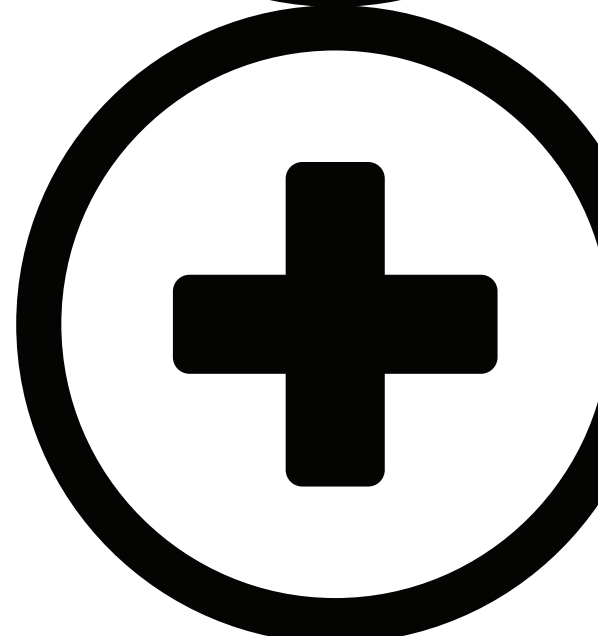

Rare Disease UK

Rare Disease UK is a campaign advocating for equitable access to diagnosis, coordinated care, and specialist treatment for the 3.5 million people affected by rare conditions in the UK.

SWAN UK

The only dedicated support community in the UK for families affected by a syndrome without a name (SWAN) – a genetic condition so rare it often remains undiagnosed.

Genetic Alliance UK is a small and impactful charity with a mighty mission. Please consider donating to help us continue our vital work with our member organisations to improve the lives of the 3.5 million people in the UK with a rare, genetic or undiagnosed condition.
